The Miracle Dogs

In late 2012, a group called Miracles of Hope contacted our Dog Behavior Coordinator, Barnee Woolf. Miracles of Hope is focused on providing trained working dogs to children and adults facing the challenges associated with diabetes and other related illnesses. Today, Rescue Village is the exclusive provider of Miracle Dogs to the organization. This is the story, as told by Barnee Woolf, of RV puppies who have found love and life with a purpose.

“Based on my experience and contacts in the ‘working dog world,’ I have been successful in finding avenues for some of our shelter dogs to go into working dog homes. Miracles of Hope is dear to my heart. We all know someone who has diabetes and has had to learn to deal with this devastating disease.”

“In my everyday work at the shelter, I keep my eye out for ‘that special little pup’ who might become a service dog for Miracles of Hope. It’s not magic, as romantic as that would be. I have years of experience in the ‘working-dog world’ and have evaluated thousands of dogs at Rescue Village.”

“Last April, I selected two puppies for the training program. A pup named Tank is now in Arizona with a young boy who is a Type 1 diabetic. Stella is now in Florida with an adult male who has had diabetes since he was seven. In September 2013, a pup named Hawk went into training for a young boy in Alabama. Already in 2014 we have picked another pup, Brody, who is in training and awaiting assignment.”

“Litters of adorable pups come to RV to get adopted. They’re wiggly, playful, and will make wonderful pets. But a few have those special qualities needed to be a service dog. People say I ‘have a nose’ for picking out noses. That’s only partly true. I work them through a series of ‘puppy aptitude’ tests. The people who will get these dogs have individual family lifestyle needs and expectations.”

“Stella and Tank are with their partners and doing a great job! Stella has her work cut out for her. She is an ‘alert dog’ for Brian, a body builder/MMA fighter and personal trainer. Lucky for us, we knew his profile before choosing a dog for him. I continue to consult with Brian. In many ways, it’s been a learning curve for me too as I train with over 1000 miles between us.”

“I have heard that Stella has already alerted Brian about a problem quickly enough for him to respond and react with self-care. This is why I do it. I care for the safety of my fellow humans, our puppies, and the future success of the program and our partnership.”

- Robert Sowthey

Happy Spring!
I Never Met a Springtime I Did Not Like

They say that, when it comes to animals, our voice is their voice. So, on their behalf, I have a few things to say about why animals love springtime. No more one-minute walks to pee on two-foot high snow banks. A break from snow freezing on wet whiskers. More time to chase squirrels and rabbits and skunks. Long walks and play dates. Going on a diet and getting back some of their springtime figure (if you want to donate food, skip the cake, and bring on the carrots). Dog walkers enjoying the wooded trails and keeping an eye out for dogs lurching to springtime squirrels, rabbits, and skunks. Outdoor playgroups that end with happy, calm dogs. And flowers.

It is a time for rebirth and putting plans to work that have been in the making while we have been hibernating. Fix It in the Farmland, our rural spa/neuter program, is up and running full speed. Summer camps are being prepared. Horses have shed their winter coats. But there is something different in the air this spring. Breaking ground on the expansion and remodeling of Rescue Village is not far off. We have been busy raising the money for the “Raising the Roof to Save More Lives” campaign. The successes we have enjoyed, getting generous support from our community, mean that we are much closer to achieving our $3M goal. We still need everyone’s generosity, but we are well on our way.

The animals’ and humans’ spirits are revived. Despite the weather, compassion is a year round passion. And, taking a lyric from a favorite song, “Just remember in winter, the bitter snow better, the sun’s love, in the spring becomes the rose.”
How do I know if kittens have been abandoned?  

There are a few ways to tell if kittens are abandoned. A few questions you should ask yourself about the kittens:  

- Are they hungry?  
- Do they have a mother?  
- Are they injured?  
- Do they have a place to sleep?

If you answer yes to any of these questions, then the kittens might be abandoned. If you see kittens that you believe have been abandoned by their mother, before you scoop up those little bundles, make sure you know if the kittens are truly abandoned.

How can I help?  

If you are interested in joining our amazing group of foster homes to help raise orphaned kittens before they are ready for adoption, fill out a foster application at www.geaugahumane.org and help us save more kittens this year!

KITTEN SEASON IS COMING! You may have heard that phrase used this time of year, but what does it mean? A cat’s breeding season begins in early spring and ends in late autumn. Their gestation period averages about 64 days, so shelters start seeing kittens in spring with the influx of kittens slowing in late fall/early winter.

We start getting phone calls about kittens that people believe have been abandoned by their mother. Before you scoop up those little bundles, make sure you know if the kittens are truly abandoned.

A Wildly Interactive Partnership

An exciting partnership has been created between the Humane Education Department at Rescue Village and The Great Lakes Science Center. We teamed up with the world-renowned Canadian Science North & Dynamic Earth to present our rescue efforts at their traveling exhibit, Wildlife Rescue. The Great Lakes Science Center hosted the program from January 2014 through April 2014.

This wildly interactive exhibit featured six hands-on zones that involved visitors in compelling stories of animal rescue, the dedicated people who are taking action, and the science that supports their efforts. From rescue’s beginnings to their end, visitors got an up-close and personal feel of what it takes to rescue animals in the wild, and companion animals as well. Rescue Village Ambassador Therapy dogs helped greet visitors as they learned about the rescue efforts of all companion animals.

Save the Date - June 14, 2014

I fully believe that our pets pick us and Gus was no exception.

He is absolutely the life of the house... he is so loved and adored!

- Amanda Hart
Kirby & Dwight

My husband and I adopted our first kitten, Kirby, on October 30, 2011. Kirby was the CUTEST kitten we had ever seen, but he was trouble! He needed a friend to play with!

On February 10, 2012 we went back to Rescue Village to adopt Kirby’s new brother, Dwight. At first, Kirby wasn’t sure about Dwight. But a few hours later they were inseparable and... I get home and they’re snuggling, cleaning each other, or eating together. I can’t imagine my life without our fur babies. -Kayla Phan

Ruby

We adopted Ruby at the end of August 2013 and she almost immediately made herself at home.

She loves camping and walks in the woods, but her favorite pastime is riding in the truck! This pic is of her sitting on the center arm rest watching out the windshield as I am plowing snow. We are so thankful that we found her. It’s unimaginable that someone actually gave her up, but rest assured she will always be a part of our family! -Tom and Brodie

Cookie

FROM LONELY HEARTS CLUB TO BECOMING A DOG WITH A JOB

When I first met Katie, she was just coming out of her shell thanks to Barnee Woolf (RV’s Dog Behavior Coordinator). Barnee asked me for assistance since I help with dogs in need of emergency intervention. She had responded so well that - you guessed it - I did not want to give her up. I had promised her a home by Christmas and the promise was kept. Now named Cookie, as in Christmas Cookie, she shares my home with a boxer and a Maine Coon cat.

Since I am a dog trainer, I plan to use Cookie as a demo and decoy dog since my elderly boxer, another Rescue Village dog, is retiring. Who would have guessed that Cookie had all this talent when she first arrived at Rescue Village! -Carole

Happy tails
What if we could save even more lives? What if we could build an even larger humane community? “Raising the Roof to Save More Lives” is the campaign for expanding and remodeling Rescue Village that will help do just that.

We can’t always control what happens in life, but we do have something to do with how we transform what happens to us and to animals.

This building has been a home for the humane society and a way station for over 25,000 animals who needed a forever home. Over 30,000 animals have been spayed and neutered since we opened in 2001. Our humane law enforcement program has investigated over 20,000 complaints and removed thousands of animals from cruelty and neglect.

In order to meet the growing needs of Geauga County, Chagrin Valley, and the northeast Ohio community, we need this expansion and remodel. We have made this wonderful building work, but we need so many things that this space does not allow.

We have a compassionate community that has embraced Rescue Village and shared our dream of building a world-class humane society ... a shelter that lives in Geauga County, yet serves the entire region.

We welcome your support and involvement. This is YOUR humane society and it shares your values: saving more lives, providing more enrichment, offering more solution-based spay/neuter surgeries, and expanding our education program. This has been a dream and is now becoming a reality. With YOUR help, we will soar!

We are very excited to announce the launch of www.rvcampaign.org. Check it out! This website has been designed to offer you and our entire community a place to find out what the campaign is all about. The site will feature building plans, construction updates and photos, fundraising progress, testimonials, and much, much more. It will also contain an online donation portal and list of naming opportunities!

We invite you to take a look and to keep checking in with us from time to time. The site is still under construction and will be growing over the next few months. Hopefully, you’ll notice something new each time you visit. Also, we encourage you to sign up for the Campaign E-Newsletter to get the latest news forwarded directly to you! Help us in Raising the Roof to Save More Lives!
Geauga Humane Society’s Rescue Village Launches $3 Million Campaign

I Never Met a Springtime I Did Not Like

They say that, when it comes to animals, their voice is so clear. On behalf of our staff and the entire Companion Animal Network, we have a few things to say about why animals love springtime so much. No more one-minute walks. More time to chase squirrels and rabbits and skunks. Long walks and play dates. Going on a diet and getting back their pet size figures.

Okay, enough about them. I have that I say I have never met a springtime I did not like. At Rescue Village, spring has brought wonderful changes. Humans on diets and getting back our pet size figures (if you want to donate food, skip the cake, and bring on the carrots). Dog walkers enjoying the wooded trails and keeping an eye out for our dogs lurching to squirrels, rabbits, and skunks. Outdoor playgroups that end with happy, calm dogs. And flowers.

It is a time for rebirth and putting plans to work that have been in the making while we have been hibernating. Fix It in the Farmland, our rural spay/neuter program, is up and running full speed. Summer camps are being prepared. Horses have shed their winter coats. But there is something different in the air this spring. Breaking ground on the expansion and remodeling of Rescue Village is not far off. We have been busy raising the money for the "Raising the Roof to Save More Lives" campaign. The success we have enjoyed, get our support from our community, mean we are much closer to achieving our $3M goal. We still need everyone's generosity, but we are on well on our way.

The animals' and humans' spirits are renewed. Despite the weather, compassion is a year round passion. And, taking a lyric from a favorite song, "Just remember in the winter, the bitter snow, the bite that with the sun's love, in the spring becomes the rose."

Information in RV Reporter is believed accurate. Geauga Humane Society does not accept responsibility for errors or omissions. Consult your veterinarians for animal-related concerns. It is a general policy not to solicit or give away our directory. We, however, reserve the right to share the list with internal companion animal partners who are working with us to advance our mission. If you do not want us to provide strategic partners with your name, please send written notification to: Box 116, routes 1, 51 & 6, Willoughby. remembrances
October 1, 2013 - January 1, 2014

In Memory of Companion Animals

In honor of Companion Animals and cats in the family

Lake Humans, Cleveland APL and Portage APL for loaning us crates

Donna Donhauser, Linda Betzer, Tim Thurman, Wendy Lewis, Sharron Russell, Sue Carlson, Carla Michelson and Jane Geissler for taking extra shifts to help clean resident cats during the furnishing case seizure

Dana Hollister for picture-taking and the many volunteer cats she works with daily for field work.

Kenny Bosco, Mary E. LaRue, Lynn B. Taylor and Larry and Sharon Kahn for taking on extra shifts when we need them most. Lynn Dula, Nora Nemec, and the dogs at the animal kitchen clean and tidy.

Gai Russo for her community care and coordination of events from the Heart.

Greats Missy Rose and Diana Fitz for realizing the spay neuter campaign. The successes of Rescue Village is not far off. We have been busy raising the money for the "Keurig for the Keurigs" campaign. The successes of Rescue Village are wonderfully for many years. Mary Whiting for the Kearney Foundation. Thank you.

Ambassador Dogs for travels to the rescue center and multiple schools

Jan Glasser and Lori Gorrell for assisting at the Cat Walk for spay neuter documentation the seizure in photographs.

Hannah, Mary E. LaRiccia and Steven Kinsip for making every effort on our behalf.

The Miracle Dogs

In late 2012, a group called Miracles of Hope contacted our Dog Behavior Coordinator, Barnee Woolf. Miracles of Hope is focused on providing trained working dogs to children and adults facing the challenges associated with diabetes and other related illnesses. Today, Rescue Village is the exclusive provider of Miracle Dogs to the organization. This is the story, as told by Barnee Woolf, of RV puppies who have found love and life with a purpose.

“Based on my experience and contacts in the ‘working dog world,’ I have been successful in finding avenues for some of our shelter dogs to go into working dog homes. Miracles of Hope is dear to my heart. We all know someone who has diabetes and has had to learn to deal with this devastating disease.”

“In my everyday work at the shelter, I keep my eye out for ‘that special little pup’ who might become a service dog for Miracles of Hope. It’s not magic, as romantic as that would be. I have years of experience in the ‘working-dog world’ and have evaluated thousands of dogs at Rescue Village.”

“Last April, I selected two puppies for the training program. A pup named Tank is now in Arizona with a young boy who is a Type 1 diabetic. Stella is now in Florida with an adult male who has had diabetes since he was seven. In September 2013, a pup named Hawk went into training for a young boy in Alabama. Already in 2014 we have picked another pup, Brody, who is in training and awaiting assignment.”

“Litters of adorable pups come to RV to get adopted. They’re wiggly, playful, and will make wonderful pets. But a few have those special qualities needed to be a service dog. People say I ‘have a nose’ for picking out noses. That’s only partly true. I work them through a series of ‘puppy aptitude’ tests. The people who will get these dogs have individual family lifestyle needs and expectations.”

“Stella and Tank are with their partners and doing a great job! Stella has her work cut out for her. She is an ‘alert dog’ for Brian, a body builder/MMA fighter and personal trainer. Lucky for us, we knew his profile before choosing a dog for him. I continue to consult with Brian. In many ways, it’s been a learning curve for me too as I train with over 1000 miles between us.”

“I have heard that Stella has already alerted Brian about a problem quickly enough for him to respond and react with self-care. This is why I do it. I care for the safety of my fellow humans, our puppies, and the future success of the program and our partnership.”

Happy Spring!
